WHO AM I?

Hello, my name is Tom Konidas and I'm a minimalist who truly believes that less is more. My passions are Software Development, Cybersecurity, Free and Open Source Software and the communities that surround them. I love knowledge and I strongly believe technology can, and should, enrich every single life our universe has to offer. I am currently studying for my CCNA.

ReactJS
NodeJS/Express
Java
REST/Postman
SQL/NoSQL
GNU/Linux/Bash

EXPERIENCE

1/2019 – Present Full Time	Full-Stack Developer Developed an internal e-commerce platform. Developed & designed an internal careers admin page connecting all the umbrella brands. Created custom software and tools to better help employees and franchisees. Generated automatic reports querying large data for helpful insights. Maintained public corporate sites for over 500 shops worldwide. Sncode / Extenso / MariaDB / jQuery / Bootstrap / Git	Fix Network
6/2017 – Present Freelance	Software Developer Generated blazing fast websites using SSG and SSR technologies. Built simple yet elegant UI/UX solutions catered to the customers needs. Performed SEO optimizations helping customers get on the first page google results. Developed variety of projects ranging from full-stack applications to blogs & landing pages. Provided maintenance and cost-efficient hosting services. React / VueJS / Node / Express / MongoDB / Git	tomkonidas.com
1/2018 – 12/2018 Full Time	Application Support Analyst Improved database performance using SolarWinds, JavaMelody and Nagios. Applied patches to large codebase and installed on all customers' environments. Obtained 'Pat on the back' award from customer for going beyond and beyond my responsibilities. Reproduced bugs and logged tickets to R&D. Provided on-site support for customers. Java / MS SQL / SCRUM / SVN	Tecsys Inc.
9/2017 – 12/2017 Internship	Engineering/Marketing Hired as the link between Engineering and Marketing to work on the Ranger Design Configurator. Optimized Meshes in Rhino5/Blender decreasing load times on the website. Created and edited CAD layouts in Solidworks helping customers visualize their custom orders. Documented product changes within ERP (Infor SyteLine). Blender / SolidWorks / Rhino5	Ranger Design
4/2016 – 9/2017 Full Time	Data Administrator / Systems Administrator Implemented a live local appointment system using Google Sheets. Resolved all issues related to computers, printers and networks. Crafted a modern, easy to navigate website. Developed python scripts to manipulate excel sheet data. Set up new Windows environments for new hires. 1/2015 – 5/2015 Internship	Full-Stack Developer Developed an admin panel (CRUD) using Google's Web Toolkit (GWT) and python back-end. Coded web-scraping scripts (Python BeautifulSoup Library) gathering potential customers. Contributed to large codebase and learned how to work with git repositories within a team. Java / Python / MySQL / REST / GWT / Git	Booxi

EDUCATION

2020 – Present

Bachelor of Computer Science
Part-Time

Concordia University

2012 – 2015

DEC in Computer Science & Technology

Vanier College

LANGUAGES

English - native

French - proficient

Greek - rudimentary

HOBBIES

Playing around with networks and hardware (Raspberry Pi). Discovering new podcasts and listening/viewing to conference talks. Producing music, videos and graphic art. Keeping up to date with FOSS and Hacker culture.

NON PROFIT

I help run the local Montreal Elixir Meetup by recording the talks and edit/post them online.
